## TOUGH PROTECTIVE COATING

**RAPTOR TOUGH PROTECTIVE COATING** is a durable urethane coating that provides surfaces with a protective barrier that can withstand the toughest situations.

Developed to tolerate most climatic conditions, **Raptor** is U.V. resistant and won't fade or "chalk" even after years in the sun. **Raptor** is also waterproof and protects surfaces from rust making it perfect for surfaces that will be submerged in water, including salt water.

**Raptor** is unlike other bed liners or protective coatings. It's less expensive and easier to apply than other industrial coatings. And in case it does scratch (which is tough to do!), **Raptor** can easily be repaired. You can't do that with most of the other bed liners and protective coatings!

**When you need a surface protection solution that can stand up to the elements, choose Raptor**

## Raptor 4:1 Anti-Corrosive Epoxy Primer Kit

**Raptor** Anti-Corrosive Epoxy Primer is a 2K high performance primer specifically designed to be used under **Raptor** Protective Coating to further extend the protective and anti-corrosive properties of **Raptor**. The advanced resin technology in **Raptor** Anti-Corrosive Epoxy Primer improves adhesion to bare metal and most other prepared surfaces, and promotes intercoat performance to further extend the life of **Raptor** Protective Coating. It contains a blend of anti-corrosive additives to inhibit rust and corrosion and offers excellent salt spray resistance.

- Can be applied directly over surface rust
- Can be applied wet on wet
- 1L covers approximately 60 sq feet at 3 MIL
- Salt spray resistance test completed at > 2,500 hours according to ASTM B117 at an independent laboratory

## Raptor Adhesion Promoter

Promotes paint adhesion to most automotive surfaces, like plastics, aluminum, galvanized metal, zinc, painted surfaces, fiberglass and even body fillers. Can also be used to improve adhesion in areas that are hard to reach and sand, like under hoods, deck lids, cracks and corners.

- Excellent adhesion characteristics
- Sprays flat
- Can be top-coated with Raptor as well as most water or solvent based paint systems
- Provides a protective barrier against lifting or solvent attack

## Raptor Acid Etch Primer

Phosphoric acid ester formula promotes paint adhesion to difficult substrates, like galvanized steel and aluminum. Use for small areas of exposed bare metal, like rub throughs, before applying Raptor.

- Etch and prime bare metal in one step
- Flat fan high atomization nozzle offers a large fan pattern and excellent coverage
- Creates an anti-corrosive barrier that prevents steel from rusting
- Can be directly coated with Raptor without sanding
